TEST FIXTURE — USER MANUAL (PDF) RNGenius — The Button-Based Random Number Revolution

Version: 0.1 • 2025-10-03T17:05:56Z DISCLAIMER This document is a playful, exaggerated manual for a fictional app. It exists only to test document extraction pipelines. Please do not confuse it with real product documentation.

GETTING STARTED 1. Open the RNGenius web page. 2. Breathe in. Breathe out. Feel the
chaos within. 3. Click the mighty button labeled "I'm Feeling Chaotic". 4. Behold: a number appears. It is random. It is yours. 5. Copy the number into your plan: odd → adventurous task, even → admin task. 6. Celebrate your new workflow, which is 100%
scientifically unserious.

FAQ Q: Is it truly random? A: As random as your destiny. Also, as random as a standard RNG. Q: What if I dislike the number? A: Click again. Or embrace fate. Up to you. Q: Does this require quantum hardware? A: No. But it requires quantum-level confidence. SAFETY - Do not operate heavy machinery while giggling. - If you get 42, you must make tea.
